

## Department of Defense (Military Contracts)

Our Department of Defense recruiters work with companies who work with the military in the IT, Engineering, and Aerospace/Aviation industries. Most of these contracts are one year; but duration may vary from position to position.

This is a very competitive industry to work in. Candidates are constantly being evaluated after each year. Having the right combination of experience, degrees, certifications and licenses is key to being successful.

---

Our recruiters are always seeking professionals who are interested in overseas opportunities with the military. Our recruiters can help with providing career advisement, resume critiquing, interviewing tips and exit strategies. We can be your eyes and ears within the job market and let you know when an opportunity arises in line with your career goals and plans.

We work with each candidate to understand when their contract is ending and what opportunities they are interested in pursuing after the completion of their current agreement. We also can assist with the transition back to corporate America. We have a successful track record of placing System Engineers, Network Engineers, VTC Engineers and IASOs. Our DoD—Military Contracts recruitment expertise includes the following, but is not limited to:

### Areas of Expertise

System Administrator

Cisco Network Engineer

Microsoft System Engineer

SharePoint Specialist

VTC Engineer

Biometrics

Help Desk

Network Security

Field Technicians

Information Assurance
