

Information Technology

Information Technology is an industry which is dynamic and fast paced. Companies are always searching for candidates with update to date certifications. Professionals in this industry are constantly having to continue their education to keep up with new technology. With the right experience, degrees and certifications progressing within this industry can be fast an explosive.

The Department of Labor has forecasted this industry to see a rise in the labor force, as well as, an increase in overall compensation until 2016.

Our recruiters are constantly networking with Information Technology professionals who are career motivated. We work with both active and passive job seekers. Our recruiters can help with providing career advisement, resume critiquing, interviewing tips and exit strategies. We can be your eyes and ears within the job market and let you know when an opportunity arises in line with your career goals.

We currently work with Fortune 500 companies, private companies, and Department of Defense or Military overseas contracts. We have a successful track record of working with a wide range of IT professionals from 2 years experience to senior management level (over 15 years). Our IT/Technology recruitment expertise includes the following, but is not limited to:

Areas of Expertise

Director or Vice President
