

Manufacturing

Manufacturing is an industry which is constantly faced with the challenge of automation and streamlining production to control cost. Professionals with the right experience, degrees and certifications can provide the right formula for a successful career.

The Department of Labor has predicted a slight decline in the labor force between 2006—2016 due to operations moving overseas as well as the increase use of technology.

We are always interested in meeting Manufacturing professionals who are interested in succeeding in their career. Our recruiters can help with providing career advisement, resume critiquing, interviewing tips and exit strategies. We can be your eyes and ears within the job market and let you know when an opportunity arises in line with your career goals and plans.

Our recruiters have experience working with a wide range of Texas manufacturing companies. We have a successful track record of placing top professionals from managers to directors. Our Manufacturing recruitment expertise includes the following, but is not limited to:

Areas of Expertise

Chief Operating Officer
VP of Manufacturing
Director of Manufacturing
General Managers
Production Managers
Quality Managers
